Junior ICT Business Analyst · Melbourne VIC
0433 940 833 · jefpkos@gmail.com · linkedin.com/in/jeffreykosasih · jeffreyko.com
Full work rights · Applying for a 2-year Temporary Graduate visa (subclass 485) · Available full-time

PROFILE

Master of IT graduate looking for a junior ICT Business Analyst role in Melbourne. Former Product Owner in digital banking at Bank Central Asia, with a software development background and 3 years in Melbourne warehouse and delivery work. Hands-on with requirements gathering, BPMN process maps, user stories with acceptance criteria and UAT planning.

SKILLS

Business analysis: requirements elicitation, stakeholder analysis, as-is and to-be process mapping (BPMN), process improvement, functional and non-functional requirements, user stories, acceptance criteria (Given/When/Then), MoSCoW, options analysis, business case, risk register, user acceptance testing (UAT), wireframes

Delivery: Agile and Scrum, backlog refinement and prioritisation, SDLC from discovery to release

Data: Excel; SQL (basic: joins, GROUP BY); smart-meter data analysis (capstone)

Tools and technical: Jira, draw.io, Cin7 (order software), Git and GitHub; can read and write code (TypeScript, JavaScript, React)

BUSINESS ANALYSIS PROJECTS

iDriver: newspaper delivery app · Self-initiated case study, full write-up at jeffreyko.com 2026

- Mapped the current process in BPMN (draw.io) across drivers, the app and customer service, based on first-hand delivery work, and found 4 pain points, including a compliance check repeated at every login.
- Wrote 10 requirements (prioritised with MoSCoW) and 6 user stories with Given/When/Then acceptance criteria. Proposed flow: 2 steps from login to route instead of 4, with the check asked once per shift.
- Planned UAT with 4 drivers, set 4 success measures and tested them with SQL on a practice dataset (32 drivers, 12 weeks).

EnergyAI: AI pilot-to-production business case · Capstone, Kaplan Business School (case-study client) 2026

- Analysed why the client's AI pilots stalled before going live and showed that 4 barriers (legacy integration, security approval, regulatory evidence and unmeasured benefits) fed into each other.
- Compared 4 delivery options on cost, risk, time to first benefit and regulatory fit, and recommended a staged approach with smaller funding steps the client could approve.
- Wrote the business case: objectives and success measures, scope, stakeholder analysis, benefits, risk register and a staged plan with decision gates, supported by analysis of public smart-meter data.

EXPERIENCE

Product Owner · Bank Central Asia (BCA), Jakarta Jan – Apr 2022

- Managed the backlog and feature priorities for BCA digital banking products used by millions of customers, including a portal and a data-monetisation project.
- Gathered requirements from business units and turned them into prioritised features the engineering team could build, balancing customer needs, technical limits and business goals.
- Acted as the main contact between business, design and engineering, and helped settle scope and trade-off decisions.

Software Engineer Intern · Apple Developer Academy @ UC (University of Ciputra), Surabaya Feb – Nov 2021

- Product Manager and iOS developer for Readdy, a team app that lets people with dyslexia scan text and read it more easily.
- Worked across the full lifecycle: planning and prioritising features, writing specs, then designing, building and testing iOS features in SwiftUI.

WAREHOUSE AND LOGISTICS EXPERIENCE

Warehouse and Delivery Roles · Melbourne 2023 – present

- Pick packer at Koko Black and Mount Zero Olives (2026 – present); set up shipments for dispatch in Cin7 at Mount Zero.
- Delivery driver at National Distribution Service on early-morning newspaper routes, the work behind iDriver. Earlier pick packer and forklift driver at NDS, plus Toll, GripX, Hilton Foods and Ondeck Resources.
- Help supervisors with workflow and task allocation, and train new team members. Worked alongside full-time study.

EDUCATION

Master of Information Technology (Extension) · Kaplan Business School, Melbourne 2025 – 2026
Course completed, graduating December 2026. Also doing a Power BI and Tableau course (Oct – Dec 2026).

Bachelor of Information Technology · University of Ciputra, Surabaya 2015 – 2019
